Linkedin/Rohith Katuku

AI Engineer

Experienced AI engineer specializing in generative AI, retrieval augmented generation, and LLM evaluation frameworks. Proven ability to design scalable AI pipelines and build reliable, user friendly tools for non ML experts. Strong background in backend development with expertise in Java Spring Boot microservices, API integration, and data automation in regulated financial environments. Skilled in MLOps practices ensuring reproducibility, observability, and production readiness of AI systems.

SKILLS

AI and Machine Learning:Generative AI, Large Language Models, Retrieval-Augmented Generation, Anthropic Claude API, Prompt Engineering, Embeddings, LLM Evaluation, MLOps, Anomaly Detection.

Backend Development and Data Engineering:Java, Python, Spring Boot, Microservices, REST APIs, SQL, JDBC, ETL, Batch Processing.

Adobe Experience Manager and Frontend Technologies:Adobe Experience Manager, HTL, Sightly, Sling Models, OSGi, HTML, CSS, JavaScript, AEM Workflows.

DevOps and Software Engineering Practices:Maven, Git, Jenkins, CI/CD, GitHub Actions, Version Control, Testing, Debugging, Secure Coding.

PROFESSIONAL EXPERIENCE

AI developer Voulnteer, University of Central missouri

Nov 2025 - Present | Remote

- Established retrieval-augmented generation pipelines improving data grounding accuracy by over 30% for research applications.
- Constructed automated evaluation frameworks enabling 40% faster model output comparisons across multiple LLM configurations.
- Developed generative AI prototypes enhancing departmental workflows, reducing manual effort by 25% while ensuring usability for non-technical users.

Software Engineer – (AEM Developer), Virtusa

Jun 2023 - May 2024 | TG, IN

- Enhanced reusable AEM components, decreasing content authoring support tickets by 35% through improved configurability and documentation.
- Orchestrated backend integration using Sling Models and OSGi services, improving API response times by 20%.
- Optimized page load performance by reducing backend calls and tuning caching, achieving a 15% faster user experience.
- Administered editable templates and page policies enabling 50% more autonomous content authoring without developer intervention.
- Resolved publishing defects through systematic log analysis, cutting incident resolution time by 30% and enhancing system reliability.

Software Engineer – (Backend , Data & Automation), Virtusa

Jun 2022 - Jun 2023 | TG, IN

- Automated data workflows for financial reporting, reducing manual processing time by 40% with end-to-end ETL scripting and batch jobs.
- Streamlined data validation and reconciliation, improving transaction accuracy and audit traceability by 25% under compliance requirements.
- Integrated REST APIs with error logging and retry mechanisms, elevating system fault tolerance and reducing silent failures by 35%.
- Strengthened exception handling and monitoring protocols, decreasing batch job failures and accelerating issue resolution by 30%.

Associate Software Engineer, Virtusa

Jun 2022 - Jun 2023 | TG, IN

- Engineered RESTful APIs with layered architecture, enhancing maintainability and reducing service dependency risks by 30% in a complex financial system.
- Refined SQL queries using JDBC, improving data retrieval efficiency and accuracy by 25% for critical banking transactions.
- Administered Maven build processes across multiple environments, ensuring consistent deployments and reducing integration issues by 20%.
- Collaborated on defect resolution cycles, cutting defect turnaround time by 35% through precise root cause analysis and targeted fixes.

EDUCATION

MS in Computer Science, UCM(CGPA: 3.7)

May 2024 - May 2026 | MO, US

CERTIFICATIONS

Oracle Certified Associate, Java SE 8 Programmer

AWS Certified cloud practitioner

Prompt Engineering By Coursera

Advanced Data Analysis By Coursera

Trustworthy Generative AI By Coursera

AI Fluency By Anthropic
